

Project Assurance

Supporting your journey in digital innovation and transformation

The push towards digital innovation and transformation is creating new challenges in project execution and testing operation for CIOs, CTOs and CDOs. After all, managing technologies such as Cloud Computing, Hybrid IT, Blockchain, Data Analytics, and IoT are akin to stepping into uncharted waters for many. It is increasingly difficult to juggle between delivery methods used for traditional enterprise IT and new digital enterprise models. Amidst the high pressure to deliver results on-time and on-budget, a mature set of processes and methodologies and dedicated skills in these relevant areas can help prevent costly missteps in such programs and projects.

Your challenges

Large or complex projects?
High pressure to deliver?
Costly revisions?

Require resource or skill
augmentation to give the
project a boost?

Spearheading a digital initiative?
Embarking on a mega
transformation journey?

Our services

Health Checks

Project risk reviews before, during, and after the project implementation.

Augmentation

Quality assurance augmentation for a variety of project resources and skill sets.

Strategic Project Services

Portfolio, Program, and Project Management Office (PMO) services.

Value-add

- **Strengthen stakeholder confidence** with an independent review on project status.
- **Increased oversight** of project health status.
- **Reduction or avoidance of costs** through early identification and mitigation of project issues and risks.

- **Optimize the cost and effort** to hire, train and retain BAU staff.
- **Access to KPMG's dedicated team**, equipped with specialized skill sets to perform testing and quality assurance.
- **Leverage on "best practices"**, with a mixture of automated and manual techniques.

- **Dedicated and experienced PMO resources**, providing structure and facilitating collaboration through common processes.
- **"Pay-As-You-Go" approach** for resourcing of scarce PMO staff (which are usually transient in nature).
- Ensure programs / projects are **well managed overall**, including stakeholders, financial and change management.

Why KPMG?

Our team has extensive experience in delivering Independent Project Assurance (IPA) services in complex environments. We work with program stakeholders, internal audit and external auditors in order to provide the right level of assurance required.

Our proven KPMG IPA methodologies include leading practice standards, methodologies, and the practical experiences of subject matter specialists (e.g. AGILE, PMP, CISA).

About KPMG Digital Trust

KPMG Digital Trust provides Information Technology (IT) assurance and audit services as well as technology risk advisory related services. This includes IT project assurance, data analytics, data governance, IT risk and security, data privacy and protection, business resilience, and IT regulatory compliance.
