2021 update – Year-end 2020

[kpmg.com](https://www.kpmg.com)

Global Trading Tax (GTT) Services is a group of highly skilled and experienced professionals from KPMG LLP (KPMG), the U.S. member firm of KPMG International, who focus on international tax issues facing the alternative investment industry. We draw upon decades of cumulative alternative investment industry experience gained from working within the private sector, government, and top professional service organizations. This enables us to identify, understand, and analyze issues with a high degree of skill and from a multitude of perspectives. As a result, KPMG is a leader in its ability to deliver top-level GTT Services that are at once practical, business-oriented, relevant, and operational.

The tables below summarize the taxation of income and gains derived from listed securities in 123 markets around the world as of December 31, 2020. This year's update includes a number of additional countries. This information, which is provided by the KPMG International member firm in each respective country in the chart, provides a general outline and should not be relied upon for purposes of structuring transactions or making investments. Please note that while every effort has been made to provide up-to-date information, tax laws around the world are constantly changing. Accordingly, the material contained in this publication should be viewed as a general guide only and should not be relied upon without consulting your KPMG International member firm tax adviser. Further, the assumptions noted below should be considered in the context of the summary information provided for each market.

Assumptions and additional notes:

1. Except where otherwise noted, this chart does not apply to (i) privately held (unlisted) securities, (ii) portfolio companies whose assets consist largely of real estate, or (iii) portfolio companies in which the fund is a substantial shareholder (e.g., an owner of 10% or more of the share capital).
2. Except where otherwise noted, this chart reflects the gains tax rules related to equities. The gains tax rules related to debt instruments are complex. In some countries, gains from the sale of debt instruments may be treated as interest and taxed accordingly.
3. The chart assumes that the investing entity provides all required documentation to the portfolio company and the local tax authorities to certify its tax residency status.
4. Reduced dividend withholding rates for "substantial shareholdings" (typically ownership of 10% or more of the portfolio company's share capital) are assumed not to apply.
5. For purposes of performing an analysis of financial statement exposure, it may be necessary to determine the foreign tax rates that applied in prior years. This chart reflects only current rates.
6. This chart does not account for the possibility that all or a portion of any cash distribution may be considered a nontaxable return of capital under local laws.
7. This chart does not address other applicable transaction taxes applied to the gross value of the transfer that are not considered withholding taxes.
8. Some countries have enacted a financial transaction tax. These taxes are imposed on all financial transactions and are not addressed in this publication.
9. It is assumed that the investing entity does not carry on a trade or business through a permanent establishment in the country where the portfolio company is organized.
10. For withholding tax purposes, some countries may not apply "look-through" treatment to a Cayman Islands "master" fund that is treated as a partnership for U.S. tax purposes.
11. Local laws in some countries that impose gains tax on non-residents may not address the treatment of short positions.
12. Swaps and other derivative transactions may need to be examined on a case-by-case basis in each jurisdiction, considering local anti-abuse provisions and case law.

Thus, the applicable withholding tax should be 15% (provided that beneficial ownership and tax residency are substantiated).</p>
Interest	1%, 15% or 35%		Exempt	<p>Same note as dividends (above) should apply.</p> <p>From January 1, 2021 forward, no withholding tax should be withheld from interest paid out at the maturity/redemption of a bond but the recipient should include the income in the non-resident Czech tax return (unless an applicable double tax treaty provides an exemption of the income). However, if the recipient is a non-EU/EEA resident, a 1% securing tax should be withheld by the payer from the payment (unless an applicable double tax treaty provides an exemption of the income). The 1% securing tax would likely be credited against the 19% tax rate liability.</p>
