KPMG Powered for Power and Utilities

Enabling your Oracle business and technology modernization

Energy suppliers must balance competing demands from customers, regulators, and employees, all while adopting and adjusting to new technologies that are revolutionizing how the industry can meet those demands. Our team of more than 700 power and utility professionals has deep industry experience to position our clients to meet the challenges and capture the opportunities that lie ahead.

KPMG – Delivering meaningful transformations

KPMG Powered Enterprise enabled by Oracle for Power and Utilities is specifically designed and tailored to meet the unique needs of the power and utilities industry, and comes preconfigured with industry-leading practices and processes, and market-leading Oracle Cloud technologies.

With KPMG Powered Enterprise, you get tailored, data-driven solutions that help you deliver value, drive innovation, and build stakeholder trust.

Our team of professionals immerse themselves in your organization, enabling you to drive rapid business and technology modernization to achieve better functional performance, support new ways of working, help ensure processes are future-ready, and better manage risks and regulations. KPMG Powered Enterprise accelerates and guides our clients to:

- Modernize and align Human Resources, Finance, and Supply Chain systems to future-state strategies and target operating models
- Deploy innovative cloud-based automation and artificial intelligence solutions to help you deliver measurable business results
- Leverage predictive analytics to better understand market opportunities and create new offerings
- Get more value from your data and use it to inform strategies and capture market opportunities
- Proactively address and manage issues, risks, and compliance obligations facing your organization.

The Positive Impact of Digital Transformation

63% increased their profitability or performance by using XaaS*

72% recorded improvements in employee productivity

71% enhanced customer engagement

Source: 2023 KPMG Global Tech Report

XaaS stands for "Anything as a Service," and refers to delivering services and applications through a cloud-based model rather than through on-premises installations.

Why KPMG for Power and Utilities?

KPMG professionals help clients navigate industry challenges and strategically guide organizations to create solutions for a sustainable future. Established assets and accelerators include:

- **Target Operating Models** to accelerate transformation
- **Preconfigured business and technology accelerators for Oracle Cloud** ERP, HCM, and SCM solutions
- **Prebuilt integrations to third-party applications and data conversion automations** to migrate master data from legacy software
- **KPMG Oracle SaaS Extension Frameworks** to rapidly address unique requirements and needs
- **Future of Finance and Supply Chain blueprints** to drive leading practices across the organization
- **Oracle Accounting Hub Cloud business rules** to support the data transformation and preprocessing of transactional data and integration capabilities.

Designed to help you succeed

KPMG Powered Enterprise for Power and Utilities offers prebuilt, next-generation solutions optimized for Oracle Cloud.

You get the thorough, high-speed value that comes from Oracle Cloud-enabled technology combined with the knowledge of KPMG energy industry professionals.

Ultimately, it helps make your business more responsive, resilient, and competitive.
